Note 1- Summary of Significant Accounting Policies

A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of Wisconsin, the accompanying financial statements of Wausau Business Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("APP Manual").

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or market as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
- 2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or market as specified by the SVO Manual.
- 3. The Company does not own common stocks.
- 4. The Company does not own preferred stocks.
- 5. The Company does not own mortgage loans.
- 6. Mortgage backed/asset backed securities are stated at amortized cost or market based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are updated monthly using the Bloomberg data service. The retrospective adjustment method is used to value all mortgage backed/asset backed securities.
- 7. The Company does not own any subsidiaries, controlled, or affiliated entities.
- 8. The Company has no investments in joint ventures, partnerships or limited liability companies.
- 9. Derivative Securities, refer to Note 8.
- 10. The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property Casualty Contracts Premiums*.
- 11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
- 12. The Company did not change its capitalization policy in 2006.
- 13. The Company has no pharmaceutical rebate receivables.

The Company is contingently liable should the issuers of the purchased annuities fail to perform under the terms of the annuities. The amount of unrecorded loss contingencies related to the purchased annuities was \$4,304,609 as of December 31, 2006.

Note 29 - Participating Policies

Note 30 – Premium Deficiency Reserves

As of December 31, 2006, the Company had no liabilities related to premium deficiency reserves. The Company considers anticipated investment income when calculating its premium deficiency reserves.

Note 31- High Dollar Deductible Policies

As of December 31, 2006, the amount of reserve credit recorded for high dollar deductible policies on unpaid losses was \$17,678,072 and the amount billed and recoverable on paid claims was \$1,044,138.

Note 32- Discounting of Liabilities for Unpaid Losses and Unpaid Loss Adjustment Expenses

For Workers Compensation, the Company discounts its reserves for unpaid losses using a tabular discount on the long-term annuity portion of certain workers compensation claims. The tabular discount is based on Unit Statistical Plan tables as approved by the respective states at an annual discount rate of 4.0%. Asbestos structured settlements are discounted at 4.5%. The December 31, 2006, liabilities include \$14,025,533 of liabilities carried at a discounted value of \$8,676,359 representing a discount of \$5,349,174.

For all other lines, the Company does not discount its reserves for unpaid losses and loss adjustment expenses.

Note 33- Asbestos/Environmental Reserves

The Company has exposure to asbestos and environmental claims which emanate principally from general liability policies written prior to the mid-1980's. In establishing the Company's asbestos and environmental reserves, the Company estimates case basis reserves for anticipated losses and bulk reserves for loss adjustment expenses and incurred but not reported losses. The Company maintained casualty excess of loss reinsurance during the relevant periods. The reserves are reported net of expected recoveries from reinsurers and include any reserves reported by ceding reinsurers on assumed reinsurance contracts.

Upon their de-affiliation from the Nationwide Group and re-affiliation with LMIC, EICOW, the Company, WGIC, and WUIC entered into ceded reinsurance contracts whereby Nationwide Indemnity Company assumed full responsibility for obligations on certain policies with effective dates prior to January 1, 1986, including all asbestos and environmental exposures.

<u>Factors Contributing to Uncertainty in Establishing Adequate Reserves</u>

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insureds with potential exposure, (vi) the cost to resolve claims, and (vii) the collectibility of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental losses and loss adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether

there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim.

In recent years the Company, as well as the industry generally, has witnessed a significant increase in the number of asbestos claims being filed, due to a number of variables, including more intensive advertising by lawyers seeking asbestos claimants, and the increasing focus by plaintiffs on new and previously peripheral defendants, attempts to broaden the interpretation of compensable loss, and courts expanding the scope of the coverage.

Uncertainty Regarding Reserving Methodologies

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based upon historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment.

During the third quarter of 2005, the Company completed its biennial ground-up asbestos reserve study. As part of that review, a multi-disciplined team of internal claims, legal, reinsurance and actuarial personnel completed their comprehensive review of the Company's asbestos exposure on a direct, assumed, and ceded basis including potential exposures of large policyholders that were individually evaluated using the Company's proprietary stochastic model, which is consistent with the latest published actuarial paper on asbestos reserving. Among the factors reviewed in depth by the team specialists were the type of business, level of exposure, coverage limits, geographic distribution of products, types of injury, state jurisdictions, legal defenses, and reinsurance potential. Small policyholders were evaluated using aggregate methods that utilized information developed from the large policyholders. Additionally, a provision of pure IBNR was established for the potential emergence of first-time filers of future asbestos claims. Based on this internal study, the Company increased its asbestos reserves by \$812,000.

Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

As a direct result of the significant uncertainties associated with estimating its asbestos and environmental exposures and establishing appropriate levels of reserves, the ultimate liability of the Company for asbestos and environmental exposures may vary materially from the reserves currently recorded. The Company and other industry members have and will continue to litigate the broadening judicial interpretation of policy coverage and the liability issues. If the courts continue to expand the scope of the coverage provided, additional liabilities could emerge for amounts in excess of reserves held. This emergence, as well as the other uncertainties noted above, cannot now be reasonably estimated, but could have a material impact on the Company's future operating results, and financial condition.

The table below summarizes reserve and loss activity for the Company's asbestos and environmental loss and loss adjustment expenses for each of the five most recent calendar years. Gross reserves for both asbestos and environmental are representative of all Liberty pooled companies. Net reserves for asbestos and environmental are allocated based on the Company's Inter-Company Reinsurance Agreement as discussed in Note 26.
