NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of Indiana, the accompanying financial statements of American Economy Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("APP Manual").

The Company does not have any prescribed or permitted accounting practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company applies the following accounting policies, where applicable:

1. Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the SVO Manual.
3. Common stocks are carried at fair value, except that investments in stocks of subsidiaries, controlled and affiliated ("SCA") companies are carried according to Note 1C(7).
4. Preferred stocks are carried at cost or fair value as specified by the SVO Manual. Preferred stocks of SCA companies are carried according to Note 1C(7).
5. Mortgage loans are carried at unpaid principal balances, less impairments as specified by the SVO Manual.
6. Mortgage backed/asset backed securities are carried at amortized cost or fair value based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are updated monthly. The retrospective adjustment method is used to value all mortgage backed/asset backed securities.
7. Investments in SCA companies are carried in accordance with SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities*, and the SVO Manual.
8. Investments in joint ventures, partnerships, and limited liability companies are carried in accordance with SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies*, and the SVO Manual.
9. Derivative Securities, refer to Note 8.
10. Investment income is anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property Casualty Contracts - Premiums*. Refer to Note 30.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
12. Effective January 1, 2013 the Company changed the predefined thresholds in its capitalization policy for internally developed software. The change was to bring the thresholds for internally developed software in line with industry standards. The Company's capitalization policy, including the predefined thresholds, for all other asset classes did not change.
13. The Company has no pharmaceutical rebate receivables.

4. All impaired Loan Backed Securities for which an other-than-temporary impairment has not been recognized in earnings as a realized loss as of December 31, 2013: None
5. The Company reviews fixed income securities for impairment on a quarterly basis. Securities are reviewed for both quantitative and qualitative considerations including, but not limited to: (a) the extent of the decline in fair value below book value, (b) the duration of the decline, (c) significant adverse changes in the financial condition or near term prospects of the investment or issuer, (d) significant change in the business climate or credit ratings of the issuer, (e) general market conditions and volatility, (f) industry factors, and (g) the past impairment of the security holding or the issuer. If the Company believes a decline in the value of a particular investment is temporary, the decline is recorded as an unrealized loss in policyholders' surplus. If the decline is believed to be "other-than-temporary," and the Company believes it will not be able to collect all cash flows due on its fixed income securities, then the carrying value of the investment is written down to the expected cash flow amount and a realized loss is recorded as a credit impairment.

B. Transfers and Servicing of Financial Assets

The Company participates in a Securities Lending Program to generate additional income, whereby certain fixed income and mortgage backed securities are loaned for a period of time from the Company's portfolio to qualifying third parties, via a lending agent. The Company does not participate in term loans; therefore, the Company does not have contractual collateral transactions that extend beyond one year from the reporting date. Borrowers of these securities provide collateral equal to or in excess of 102% of the market value of the loaned securities. Acceptable collateral may be in the form of cash or U.S. Government securities, such as Treasuries and Agency Bonds. Additionally, the lending agent indemnifies the Company against borrower defaults. Cash collateral is carried as an asset with an offsetting liability on the balance sheet, as the collateral is unrestricted and the Company can exercise discretion as to how the collateral is invested. Note 19 - Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

The Company has no direct premiums written or produced through managing general agents or third party administrators.

Note 20 - Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

Fair value is the price that would be received to sell an asset or would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which generally utilizes market transaction data for identical or similar instruments.

The hierarchy level assigned to each security in the Company's portfolio is based on the Company's assessment of the transparency and reliability of the inputs used in the valuation of each instrument at the measurement date. The highest priority is given to Level 1 measurements and the lowest priority to Level 3 measurements. Securities are classified based on the lowest level of input that is significant to the fair value measurement. The Company recognizes transfers between levels at the end of each reporting period. The three hierarchy levels are defined as follows:

- Level 1 — Valuations based on unadjusted observable quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2 — Valuations based on directly or indirectly observable inputs (other than Level 1 prices) at the measurement date, such as quoted prices in active markets or prices in markets that are not active for similar assets or liabilities or other inputs that are observable.
- Level 3 — Valuations based on inputs that are unobservable and reflect the Company's own assumptions about the assumptions that market participants might use.

The following table summarizes the Company's assets and liabilities that are measured at fair value at December 31, 2013:

| 1 | 2 | 3 | 4 | 5 |
|---|---------|---------|---------|-------|
| Description | Level 1 | Level 2 | Level 3 | Total |
| Assets at fair value | | | | |
| Bonds | | | | |

| Non-Issuer Obligations | - | - | - | - |
| Total Bonds | \$ - | - | \$ - | \$ - |

| Liabilities at fair value | | | | |

| Total liabilities at fair value | \$ - | \$ - | \$ - | \$ - |

The Company did not have significant transfers between Levels 1 and 2 during the period ended December 31, 2013.

2. Rollforward of Level 3 Items

The following tables set forth the fair values of assets basis classified as Level 3 within the fair value hierarchy:

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |

| Total | \$258 | \$ - | \$ - | \$ - | \$23 | \$ - | \$ - | \$ - | \$ - | \$281 |

3. Policy on Transfers Into and Out of Level 3

The Company holds NAIC designated 3-6 securities at the lower of cost or market as defined by SSAP No. 26. Market fluctuations cause securities to change from being held at cost to fair value or vice versa. These changes result in a

NOTES TO FINANCIAL STATEMENTS

transfer in or out of Level 3. In addition, the Company also transfers securities in or out of level 3 as a result of re-evaluation of the observability of pricing inputs.

4. Inputs and Techniques Used for Fair Value

Fixed Maturities

At each valuation date, the Company uses various valuation techniques to estimate the fair value of its fixed maturities portfolio. The primary method for valuing the Company's securities is through independent third-party valuation service providers. For positions where valuations are not available from independent third-party valuation service providers, the Company utilizes broker quotes and internal pricing methods to determine fair values. The Company obtains a single non-binding price quote from a broker familiar with the security who, similar to the Company's valuation service providers, may consider transactions or activity in similar securities, as applicable, among other information. The brokers providing price quotes are generally from the brokerage divisions of leading financial institutions with market making, underwriting and distribution expertise regarding the security subject to valuation. The evaluation and prioritization of these valuation sources is systematic and predetermined resulting in a single quote or price for each financial instrument. The following describes the techniques generally used to determine the fair value of the Company's fixed maturities by asset class:

U.S. government and agency

U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal Home Loan Bank, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. As the fair values of the Company's U.S. Treasury securities are based on unadjusted market prices, they are classified within Level 1. The fair value of U.S. government agency securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, reported trades, bids, offers and credit spreads. Accordingly, the fair value of U.S. government agency securities is classified within Level 2.

Mortgage-Backed Securities

The Company's portfolio of residential mortgage-backed securities ("MBS") and commercial MBS are originated by both agencies and non-agencies, the majority of which are pass-through securities issued by U.S. government agencies. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Asset-Backed Securities

Asset-backed securities ("ABS") include mostly investment-grade bonds backed by pools of loans with a variety of underlying collateral, including automobile loan receivables, credit card receivables, and collateralized loan obligation securities originated by a variety of financial institutions. The fair value of ABS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of ABS is primarily classified within Level 2.

Municipals

The Company's municipal portfolio comprises bonds issued by U.S. domiciled state and municipal entities. The fair value of municipal securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, broker quotes, issuer ratings, reported trades and credit spreads. Accordingly, the fair value of municipal securities is primarily classified within Level 2.

Corporate debt and other

Corporate debt securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair value of corporate and other securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, new issuances, issuer ratings, reported trades of identical or comparable securities, bids, offers and credit spreads. Accordingly, the fair value of corporate and other securities is primarily classified within Level 2. In the event third-party vendor valuation is not available, prices are determined using non-binding price quotes from a broker familiar with the security. In this instance, the valuation inputs are generally unobservable and the fair value is classified within Level 3.

Foreign government securities

Foreign government securities comprise bonds issued by foreign governments and their agencies along with supranational organizations. The fair value of foreign government securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, broker quotes, issuer ratings, reported trades of identical or comparable securities and credit spreads. Accordingly, the fair value of foreign government securities is primarily classified within Level 2.

Equity Securities

Equity securities include common and preferred stocks. Common stocks with fair values based on quoted market prices in active markets are classified in Level 1. Common stocks with fair values determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active are classified in Level 2. The fair value of preferred stock is generally determined using observable market inputs that include quoted prices for identical

NOTES TO FINANCIAL STATEMENTS

or similar assets in markets that are not active. Accordingly, the fair value of preferred stock is primarily classified within Level 2.

Other Investments

Other investments include primarily international loans, foreign cash deposits and equity investments in privately held businesses. International loans and cash deposits are primarily valued using quoted prices for similar instruments in active markets; these assets are categorized as Level 2 of the fair value hierarchy. Equity investments in privately held businesses are valued using internal management estimates; they are categorized as Level 3 of the hierarchy. Limited partnership investments, which represent the remainder of the other investment balance on the consolidated balance sheet, are not subject to these disclosures and therefore are excluded from the above table.
