#### Note 1 - Summary of Significant Accounting Policies

#### A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of Ohio, the accompanying financial statements of American Fire and Casualty Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") Accounting Practices and Procedures Manual ("APP Manual").

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

#### C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable

In addition, the Company applies the following accounting policies, where applicable:

- Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
- 2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the SVO Manual.
- 3. Common stocks are carried at fair value, except that investments in stocks of subsidiaries, controlled and affiliated ("SCA") companies are carried according to Note 1C(7).
- 4. Preferred stocks are carried at cost or fair value as specified by the SVO Manual. Preferred stocks of SCA companies are carried according to Note 1C(7).
- 5. Mortgage loans are carried at unpaid principal balances, less impairments as specified by the SVO Manual.
- 6. Mortgage backed/asset backed securities are carried at amortized cost or fair value based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are updated monthly using the Bloomberg data service. The retrospective adjustment method is used to value all mortgage backed/asset backed securities.
- 7. Investments in SCA companies are carried in accordance with SSAP No. 97, *Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No.* 88, and the SVO Manual.
- 8. Investments in joint ventures, partnerships, and limited liability companies are carried in accordance with SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies*, and the SVO Manual.
- 9. Derivative Securities, refer to Note 8.
- 10. Investment income is anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property Casualty Contracts Premiums*. Refer to Note 30.
- 11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
- $12. \ \ \, \text{The Company did not change its capitalization policy in 2011}.$
- 13. The Company has no pharmaceutical rebate receivables.

#### Note 2 - Accounting Changes and Correction of Errors

A. The Company adopted SSAP No. 35R, *Guaranty Fund and Other Assessments*, effective January 1, 2011. The cumulative effect of adopting SSAP No. 35R is reported in the Capital and Surplus Account and is not considered material.

The Company adopted SSAP No. 5R, *Liabilities, Contingencies and Impairments of Assets*, effective December 31, 2011. The adoption of SSAP No. 5R has no impact on the Company.

  - 3. Each Loan-Backed Security with a recognized other-than-temporary impairment held by the Company at December 31, 2011: None
  - 4. All impaired Loan-Backed Securities for which an other-than-temporary impairment has not been recognized in earnings as a realized loss as of December 31, 2011: None
  - 5. The Company reviews fixed income securities for impairment on a quarterly basis. Securities are reviewed for both quantitative and qualitative considerations including, but not limited to: (a) the extent of the decline in fair value below book value, (b) the duration of the decline, (c) significant adverse changes in the financial condition or near term prospects of the investment or issuer, (d) significant change in the business climate or credit ratings of the issuer, (e) general market conditions and volatility, (f) industry factors, and (g) the past impairment of the security holding or the issuer. If the Company believes a decline in the value of a particular investment is temporary, the decline is recorded as an unrealized loss in policyholders' surplus. If the decline is believed to be "other-than-temporary," and the Company believes it will not be able to collect all cash flows due on its fixed income securities, then the carrying value of the investment is written down to the expected cash flow amount and a realized loss is recorded as a credit impairment.

#### Note 32 - Discounting of Liabilities for Unpaid Losses and Unpaid Loss Adjustment Expenses

For Workers Compensation, the Company discounts its reserves for unpaid losses using a tabular discount on the long-term annuity portion of certain workers compensation claims. The tabular discount is based on the Unit Statistical Plan tables as approved by the respective states at an annual discount rate of 4.0%. The December 31, 2011 liabilities subject to discount were carried at a value representing a discount of \$797,039 net of all reinsurance.

For all other lines, the Company does not discount its reserves for unpaid losses and loss adjustment expenses.

#### Note 33 - Asbestos/Environmental Reserves

The Company has exposure to asbestos and environmental claims that emanate principally from general liability policies written prior to the mid-1980's. In establishing the Company's asbestos and environmental reserves, the Company estimates case reserves for anticipated losses and bulk reserves for claim adjustment expenses and incurred but not reported claims reserves ("IBNR"). The Company maintained casualty excess of loss reinsurance during the relevant periods. The reserves are reported net of cessions to reinsurers and include any reserves reported by ceding reinsurers on assumed reinsurance contracts.

#### Factors Contributing to Uncertainty in Establishing Adequate Reserves

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insureds with potential exposure, (vi) the cost to resolve claims, and (vii) the collectability of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental claims and claim adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim. The uncertainties cannot be reasonably estimated, but could have a material impact on the Company's future operating results and financial condition.

In the last few years the Company, as well as the industry generally, has seen decreases in the number of asbestos claims being filed. This turn to a more favorable trend is due to a number of factors. Screening activity used by some lawyers to find new plaintiffs utilized questionable practices discovered in the Federal Silica Multi District Litigation. Court decisions in several key states (e.g., Mississippi) have been favorable to defendants. Most importantly, several states have enacted and sustained legislation in the past few years that contain medical criteria provisions aimed at reducing the number of lawsuits filed by unimpaired plaintiffs and providing prompt and fair compensation to those who meet the criteria.

In the third quarter of 2011, the Company completed ground-up asbestos and environmental reserve studies. The studies were completed by a multi-disciplined team of internal claims, legal, reinsurance and actuarial personnel, and they included all major segments of the Company's direct, assumed, and ceded asbestos and environmental claims. As part of the internal reviews, potential exposures of certain policyholders were individually evaluated using the Company's proprietary stochastic model, which is consistent with published actuarial papers on asbestos reserving. Among the factors reviewed in depth by the team of specialists were the type of business, level of exposure, coverage limits, geographic distribution of products, types of injury, state jurisdictions, legal defenses, and reinsurance potential. The remaining policyholders (those with less potential exposure) were evaluated using aggregate methods that utilized information and experience specific to these insureds. The studies resulted in an increase to reserves. Between comprehensive studies, the Company monitors asbestos and environmental activity to determine whether or not any adjustment to reserves is warranted.

#### <u>Uncertainty Regarding Reserving Methodologies</u>

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based on historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment. In that regard, the estimation of asbestos claims and associated liabilities and the analysis of environmental claims considered prevailing applicable law and certain inconsistencies of court decisions as to coverage, plaintiffs' expanded theories of liability, and the risks inherent in major litigation and other uncertainties, the Company believes that in future periods it is possible that the outcome of the continued uncertainties regarding asbestos and environmental related claims could result in an aggregate liability that differs from current reserves by an amount that could be material to the Company's future operating results and financial condition.

#### Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

The following tables summarize the activity for the Company's asbestos and environmental claims and claim adjustment expenses, a component of the Company's unpaid claims and claim adjustment expenses, for the years ended December 31, 2011, 2010, 2009, 2008, and 2007:

Upon entering the PIC Pool, effective January 1, 2008 (refer to Note 26), the Ohio Casualty Companies' asbestos and environmental claims coding was revised to reflect the definition employed by the PIC Pool, which is consistent with industry practice. As a result, the 2007 ending balances for asbestos and environmental reserves, which is the sum of the former PIC Pool's amounts and the Ohio Casualty Companies' Pool amounts, differ from the 2008 beginning balances, which reflect a single common definition.
