## NOTES TO FINANCIAL STATEMENTS

### NOTE 1 Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of New Hampshire, the accompanying financial statements of The Ohio Casualty Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") Accounting Practices and Procedures Manual ("APP Manual").

The Company does not have any prescribed or permitted accounting practices.

#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

#### C. Accounting Policy

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company applies the following accounting policies, where applicable:

1. Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the Purposes and Procedures Manual of the NAIC Investment Analysis Office (SVO Manual).
2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the SVO Manual.
3. Common stocks are carried at fair value, except that investments in stocks of subsidiaries, controlled and affiliated ("SCA") companies are carried according to Note 1C(7).
4. Preferred stocks are carried at cost or fair value as specified by the SVO Manual. Preferred stocks of SCA companies are carried according to Note 1C(7).
5. Mortgage loans are carried at amortized cost, less impairments as specified by the SVO Manual.
6. Mortgage backed/asset backed securities are carried at amortized cost or fair value based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are based on market expectations. The retrospective adjustment method and prospective interest method are used to value all mortgage backed/asset backed securities
7. Investments in SCA companies are carried in accordance with SSAP No. 97, Investments in Subsidiary, Controlled, and Affiliated Entities, A Replacement of SSAP No. 88, and the SVO Manual.
8. Investments in joint ventures, partnerships, and limited liability companies are carried in accordance with SSAP No. 48, Joint Ventures, Partnerships and Limited Liability Companies, and the SVO Manual.
9. Derivative Securities, refer to Note 8 .
10. Investment income is anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property Casualty Contracts - Premiums. Refer to Note 30.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and an amount, based on past experience, for losses and loss adjustment expenses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
12. The Company did not change its capitalization policy from the prior period.
13. The Company has no pharmaceutical rebate receivables.

#### D. Going Concern

The Company is not aware of any conditions that would impact its ability to continue as a going concern.

(4) All impaired Loan Backed Securities for which an other-than-temporary impairment has not been recognized in earnings as a realized loss as of December 31, 2024:

- a) The aggregate amount of unrealized losses:
  1. Less than 12 Months \$ (3,437,362)
  2. 12 Months or Longer \$ (67,854,731)
  
- b) The aggregate related fair value of securities with unrealized losses:
  1. Less than 12 Months \$ 301,161,436
  2. 12 Months or Longer \$ 851,796,728

(5) The Company reviews fixed income securities for impairment on a quarterly basis. Securities are reviewed for both quantitative and qualitative considerations including, but not limited to: (a) the extent of the decline in fair value below book value, (b) the duration of the decline, (c) significant adverse changes in the financial condition or near term prospects of the investment or issuer, (d) significant change in the business climate or credit ratings of the issuer, (e) general market conditions and volatility, (f) industry factors, and (g) the past impairment of the security holding or the issuer. If the Company believes a decline in the value of a particular investment is temporary, the decline is recorded as an unrealized loss in policyholders' equity. If the decline is believed to be "other-than-temporary," and the Company believes it will not be able to collect all cash flows due on its fixed income securities, then the carrying value of the investment is written down to the expected cash flow amount and a realized loss is recorded as a credit impairment.

**B. Assessments**

(1) The Company is subject to guaranty fund and other assessments by the states in which it writes business. Guaranty fund assessments and premium-based assessments are presumed probable when the premium on which the assessments are expected to be based are written. In the case of loss-based assessments, the event that obligates the entity is an entity incurring the losses on which the assessments are expected to be based.

The Company has accrued a liability for guaranty funds and other assessments of \$6,878,139 that is offset by future premium tax credits of 361,857. Current guaranty fund assessments and assessments based on losses paid are expected to be paid out in the next two years, while premium tax offsets are realized over the period determined by each individual state once the guaranty fund assessment has been paid. The Company continues to remit payment relating to prior year insolvencies.

The Company is not a participant in any joint and several liabilities.

**G. All Other Contingencies**

Lawsuits arise against the Company in the normal course of business. Contingent liabilities arising from litigation, income taxes, and other matters are not considered material in relation to the financial position of the Company.

As disclosed in Note 9 F, the Company is a member of a controlled group for federal income tax purposes, and that group includes LMGI. LMGI is the plan sponsor of the Liberty Mutual Retirement Benefit Plan, a qualified plan under federal law. Pursuant to federal law, if LMGI has not made the minimum required contributions with respect to the Liberty Mutual Retirement Benefit Plan, the Company, jointly and severally with all other members of the controlled group, would be contingently liable to make such contributions

(2) The credit risk, market risk, cash requirements, and accounting policies of the Company's derivative instruments utilized during 2022 and 2021 are discussed in Note 8, Parts A-C.

(3) The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial instruments, but it does not expect any counterparties to fail to meet their obligations given their high credit ratings. The credit exposure is represented by the fair value of contracts with a positive statement value at the reporting date. Because exchange-traded futures are affected through a regulated exchange and positions are marked to market on a daily basis, the Company has little exposure to credit-related losses in the event of nonperformance by counterparties to such financial instruments. The Company has not incurred any losses on derivative financial instruments due to counterparty non-performance.

(4) The Company is required to put up collateral for any futures contracts that are entered. The Company pledges or obtains collateral when certain predetermined exposure limits are exceeded. The amount of collateral that is required is determined by the exchange on which it is traded and is typically in the form of cash. The Company currently puts up cash and U.S. Treasury Bonds to satisfy this collateral requirement.

**NOTE 17 Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities**

A. Transfers of Receivables Reported as Sales

- (1) The Company did not have any transfers of receivables reported as sales.
- (2) Not applicable.

B. Transfer and Servicing of Financial Assets

The Company participates in a Securities Lending Program to generate additional income, whereby certain fixed income and mortgage backed securities are loaned for a period of time from the Company's portfolio to qualifying third parties, via a lending agent. The company does not participate in term loans; therefore, the company does not have contractual collateral transactions that extend beyond one year from the reporting date. Borrowers of these securities provide collateral equal to or in excess of 102% of the market value of the loaned securities. Acceptable collateral may be in the form of cash or U.S. Government securities, such as Treasuries and Agency Bonds. The market value of the loaned securities is monitored and additional collateral is obtained if the market value of the collateral falls below 102% of the market value of the loaned securities. Additionally, the lending agent indemnifies the Company against borrower defaults. Cash collateral is carried as an asset with an offsetting liability on the balance sheet, as the collateral is unrestricted and the Company can exercise discretion as to how the collateral is invested. The loaned securities remain a recorded asset of the Company. At December 31, 2024 the total fair value of securities on loan was \$317,862,860 with corresponding collateral value of \$327,726,692 of which \$211,537,507 represents cash collateral that was reinvested.

The Company has no direct premiums written or produced through managing general agents or third party administrators.

**NOTE 20 Fair Value Measurements**

**A. Inputs Used for Assets and Liabilities Measured at Fair Value**

Fair Value Measurements by Levels 1, 2 and 3

Fair value is the price that would be received to sell an asset or would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which generally utilizes market transaction data for identical or similar instruments.

Included in various investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain bonds and preferred stock, when carried at the lower of cost or market.

The hierarchy level assigned to each security in the Company's portfolio is based on the Company's assessment of the transparency and reliability of the inputs used in the valuation of each instrument at the measurement date. The highest priority is given to unadjusted quoted prices in active active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Securities are classified based on the lowest level of input that is significant to the fair value measurement. The Company recognizes transfers between levels at the end of each reporting period. The three hierarchy levels are defined as follows:

- Level 1 — Valuations based on unadjusted observable quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access.
- Level 2 — Valuations based on observable inputs (other than Level 1 prices), such as quoted prices for similar assets or liabilities at the measurement date, quoted prices in markets that are not active, or other inputs that are observable, either directly or indirectly.
- Level 3 — Valuations based on inputs that are unobservable and significant to the overall fair value measurement and involve measurement judgment. The unobservable inputs reflect the Company's estimates of the assumptions that market participants would use in valuing the assets and liabilities.

(3) The Company holds NAIC designated 6 fixed maturity securities at the lower of amortized cost or fair value defined by SSAP No. 26, Bonds and NAIC designated 4-6 preferred stocks at the lower of cost or fair value as defined by SSAP No. 32, Investments in Preferred Stock. Market fluctuations cause securities to change from being held at cost or amortized cost to fair value or vice versa. These changes result in a transfer in or out of Level 3. In addition, the Company also transfers securities into or out of level 3 as a result of re-evaluation of the observability of pricing inputs.

## NOTES TO FINANCIAL STATEMENTS

(4) Inputs and Techniques Used for Fair Value

**Fixed Maturities**

At each valuation date, the Company uses various valuation techniques to estimate the fair value of its fixed maturities portfolio. The primary method for valuing the Company's securities is through independent third-party valuation service providers. For positions where valuations are not available from independent third-party valuation service providers, the Company utilizes broker quotes and internal pricing methods to determine fair values. The Company obtains a single non-binding price quote from a broker familiar with the security who, similar to the Company's valuation service providers, may consider transactions or activity in similar securities, as applicable, among other information. The brokers providing price quotes are generally from the brokerage divisions of leading financial institutions with market making, underwriting and distribution expertise regarding the security subject to valuation. The evaluation and prioritization of these valuation sources is systematic and predetermined resulting in a single quote or price for each financial instrument. The following describes the techniques generally used to determine the fair value of the Company's fixed maturities by asset class:

**U.S. Government and Agency Securities**

U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal Home Loan Bank, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. As the fair values of the Company's U.S. Treasury securities are based on active markets and unadjusted market prices, they are classified within Level 1. The fair value of U.S. government agency securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, reported trades, bids, offers and credit spreads. Accordingly, the fair value of U.S. government agency securities is classified within Level 2.

**Mortgage-Backed Securities**

The Company's portfolio of residential mortgage-backed securities ("MBS") and commercial MBS are originated by both agencies and non-agencies, the majority of which are pass-through securities issued by U.S. government agencies. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

**Asset-Backed Securities**

Asset-backed securities ("ABS") include mostly investment-grade bonds backed by pools of loans with a variety of underlying collateral, including automobile loan receivables, credit card receivables, and collateralized loan obligation securities originated by a variety of financial institutions. The fair value of ABS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of ABS is primarily classified within Level 2.

**Municipal Securities**

The Company's municipal portfolio is comprised of bonds issued by U.S. domiciled state and municipal entities. The fair value of municipal securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, binding broker quotes, issuer ratings, reported trades and credit spreads. Accordingly, the fair value of municipal securities is primarily classified within Level 2.

**Corporate debt and other**

Corporate debt securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair value of corporate and other securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, new issuances, issuer ratings, reported trades of identical or comparable securities, bids, offers and credit spreads. Accordingly, the fair value of corporate and other securities is primarily classified within Level 2. In the event third-party vendor valuation is not available, prices are determined using non-binding price quotes from a broker familiar with the security. In this instance, the valuation inputs are generally unobservable and the fair value is classified within Level 3.

**Foreign government securities**

Foreign government securities include bonds issued or guaranteed by foreign governments. The fair value of foreign government securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, binding broker quotes, issuer ratings, reported trades of identical or comparable securities and credit spreads. Accordingly, the fair value of foreign government securities is primarily classified within Level 2. In the event third-party vendor valuation is not available, prices are determined using non-binding price quotes from a broker familiar with the security. In this instance, the valuation inputs are generally unobservable and the fair value is classified within Level 3.

**Common and Preferred Stocks**

Common stocks are recorded at fair value and preferred stocks are reported at cost or fair value, depending on their NAIC designation. Common stocks with fair values based on quoted market prices in active markets are classified in Level 1. Common stocks with fair values determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active are classified in Level 2. The fair value of preferred stock is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active. Accordingly, the fair value of preferred stock is primarily classified within Level 2.

**Other Invested Assets**

Other invested assets include limited partnership investments, other equity method investments and other alternative investments, which are not subject to these disclosures and therefore are excluded from the table in this note.

**Derivatives**

Derivatives can be exchange-traded or traded over-the-counter ("OTC"). OTC derivatives are valued using market transactions and other market evidence whenever possible, including market based inputs to models, model calibration to market clearing transactions, broker or dealer quotations or alternative pricing sources with reasonable levels of price transparency. When models are used, the selection of a particular model to value an OTC derivative depends on the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation models require a variety of inputs, including contractual terms, market prices and rates, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model inputs can generally be corroborated by observable market data by correlation or other means, and model selection does not involve significant management judgement. The fair value of derivatives using models with observable inputs are classified as Level 2 within the fair value hierarchy and the fair value of derivatives using models with unobservable inputs are classified as Level 3 within the fair value hierarchy.

Explanations of Adjustments

A.

B.

**NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses**

A.

Incurred loss and loss adjustment expense attributable to insured events on prior years increased through the fourth quarter of 2024. The increase was driven by reserve adjustments on General Liability and Commercial Multiple Peril lines. These increases were partially offset by decreases in reserve estimates for Private Passenger Auto, Workers' Compensation, Special Property, and Fidelity/Surety lines. Prior estimates are revised as additional information becomes known regarding individual claims.

## NOTES TO FINANCIAL STATEMENTS

### NOTE 33 Asbestos/Environmental Reserves

- A. Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of, a liability due to asbestos losses? YES

#### Factors Contributing to Uncertainty in Establishing Adequate Reserves

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insured with potential exposure, (vi) the cost to resolve claims, and (vii) the collectability of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental claims and claim adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim. The uncertainties cannot be reasonably estimated, but could have a material impact on the Company's future operating results and financial condition.

In 2024, the Company and its affiliated pool members completed asbestos ground-up and aggregate environmental reserve studies. These studies were completed by a multi-disciplinary team of internal claims, legal, reinsurance and actuarial personnel, and included all major business segments of the Company's direct, assumed, and ceded A&E unpaid claim liabilities. As part of the internal review, policyholders with the largest direct asbestos unpaid claim liabilities were individually evaluated using the Company's proprietary stochastic ground-up model, which is consistent with published actuarial methods of asbestos reserving. Among the factors reviewed in depth by the team of specialists were the type of business, level of exposure, coverage limits, geographic distribution of products, injury type, jurisdiction and legal defenses. Reinsurance recoveries for these policyholders were then separately evaluated by the Company's reinsurance and actuarial personnel. A&E unpaid claim liabilities for all other policyholders were evaluated using aggregate methods that utilized information and experience specific to these policyholders. The studies resulted in an increase to reserves of \$175,000,000 including: \$85,000,000 of asbestos reserves, and \$90,000,000 of pollution reserves.

#### Uncertainty Regarding Reserving Methodologies

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based on historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment. In that regard, the estimation of asbestos claims and associated liabilities and the analysis of environmental claims considered prevailing applicable law and certain inconsistencies of court decisions as to coverage, plaintiffs' expanded theories of liability, and the risks inherent in major litigation and other uncertainties, the Company believes that in future periods it is possible that the outcome of the continued uncertainties regarding asbestos and environmental related claims could result in a liability that differs from current reserves by an amount that could be material to the Company's future operating results and financial condition.

#### Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

The following tables summarize the activity for the Company's asbestos and environmental claims and claim adjustment expenses, a component of the Company's unpaid claims and claim adjustment expenses, for the years ended December 31, 2024, 2023, 2022, 2021, and 2020 before consideration of the NICO Reinsurance Transaction. a. Description of each grouping or category used to track and monitor deteriorating insured financial obligations

Category A: Includes insured financial obligations that are still currently performing (that is, insured contractual payments are made on time but the likelihood of an event of default has increased since the financial guarantee insurance contract was first issued), but if economic conditions persist for an extended period of time, they may not be performing in the future. The issuer of the insured financial obligation may have experienced credit deterioration as a result of a general economic downturn. As a result, the present value of expected net cash outflows may exceed the unearned premium revenue of the financial guarantee insurance contract sometime in the future.

Category B: Includes insured financial obligations that are currently characterized as potentially nonperforming and may require action by the insurance enterprise to avoid or mitigate an event of default.

Category C: Includes insured financial obligations that are characterized as nonperforming and for which actions to date by the insurance enterprise have not been successful in avoiding or mitigating an event of default. The insurance enterprise continues its efforts to cure the claim, but an event of default is imminent.

Category D: Includes insured financial obligations where an event of default has occurred.

# GENERAL INTERROGATORIES

## PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

- 6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?  
The Company purchases a combination of per risk excess of loss reinsurance and excess of loss per event catastrophe reinsurance. ....
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:  
The company employs various methods, including the use of proprietary and third-party catastrophe models, in order to assess and manage the potential loss related to natural and man-made catastrophe risks. For natural catastrophe risks, the company models both property and worker's compensation exposures (where appropriate) and applies adjustments for other non-modeled exposure and loss elements. The companies loss estimates for terrorism also reflect U.S. property and workers' compensation exposures. ....
- 6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?  
The Company purchases a combination of quota share reinsurance, per risk excess of loss reinsurance, and excess of loss per event catastrophe reinsurance. ....
- 6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence? ..... Yes [ ] No [ X ]
- 6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to unreinsured catastrophic loss  
A large portion of the catastrophe and risk programs are placed on a reinstatable basis. ....
- 7.1 Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss cap, an aggregate limit or any similar provisions)? ..... Yes [ ] No [ X ]
- 7.2 If yes, indicate the number of reinsurance contracts containing such provisions. ....
- 7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)? ..... Yes [ ] No [ ]
- 8.1 Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured? ..... Yes [ ] No [ X ]
- 8.2 If yes, give full information  
0 .....
- 9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:  
(a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;  
(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;  
(c) Aggregate stop loss reinsurance coverage;  
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;  
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
