NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of Illinois, the accompanying financial statements of Peerless Indemnity Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("APP Manual").

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company applies the following accounting policies, where applicable:

1. Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the SVO Manual.
3. Common stocks are carried at fair value, except that investments in stocks of subsidiaries, controlled and affiliated ("SCA") companies are carried according to Note 1C(7).
4. Preferred stocks are carried at cost or fair value as specified by the SVO Manual. Preferred stocks of SCA companies are carried according to Note 1C(7).
5. Mortgage loans are carried at unpaid principal balances, less impairments as specified by the SVO Manual.
6. Mortgage backed/asset backed securities are carried at amortized cost or fair value based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are updated monthly using the Bloomberg data service. The retrospective adjustment method is used to value all mortgage backed/asset backed securities.
7. Investments in SCA companies are carried in accordance with SSAP No. 97, *Investment in Subsidiary, Controlled and Affiliated Entities*, and the SVO Manual.
8. Investments in joint ventures, partnerships, and limited liability companies are carried in accordance with SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies*, and the SVO Manual.
9. Derivative Securities, refer to Note 8.
10. Investment income is anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property Casualty Contracts - Premiums*. Refer to Note 30.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
12. The Company did not change its capitalization policy in 2012.
13. The Company has no pharmaceutical rebate receivables.

Note 2 - Accounting Changes and Correction of Errors

Effective January 1, 2012, the Company adopted SSAP No. 101, *Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10* ("SSAP No. 101"). There was no cumulative effect adjustment resulting from the adoption of SSAP No. 101.

	2. 12 Months or Longer		\$ (82,048)
b.	The aggregate related fair value of securities with unrealized losses:		
	1. Less than 12 Months		\$3,883,862
	2. 12 Months or Longer		\$999,668

Securities are reviewed for both quantitative and qualitative considerations including, but not limited to: (a) the extent of the decline in fair value below book value, (b) the duration of the decline, (c) significant adverse changes in the financial condition or near term prospects of the investment or issuer, (d) significant change in the business climate or credit ratings of the issuer, (e) general market conditions and volatility, (f) industry factors, and (g) the past impairment of the security holding or the issuer. Note 17 - Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of receivables Reported as Sales

The Company did not have any transfers of receivables reported as sales during the year.

B. Transfers and Servicing of Financial Assets

The Company participates in a Securities Lending Program to generate additional income, whereby certain fixed income and mortgage backed securities are loaned for a period of time from the Company's portfolio to qualifying third parties, via a lending agent. The Company does not participate in term loans; therefore, the Company does not have contractual collateral transactions that extend beyond one year from the reporting date. Borrowers of these securities provide collateral equal to or in excess of 102% of the market value of the loaned securities. Acceptable collateral may be in the form of cash or U.S. Government securities, such as Treasuries and Agency Bonds. The market value of the loaned securities is monitored and additional collateral is obtained if the market value of the collateral falls below 102% of the market value of the loaned securities. Additionally, the lending agent indemnifies the Company against borrower defaults. Cash collateral is carried as an asset with an offsetting liability on the balance sheet, as the collateral is unrestricted and the Company can exercise discretion as to how the collateral is invested. The loaned securities remain a recorded asset of the Company.

The CEA reimburses the companies for commissions and claims paid on behalf of the CEA. The companies also receive an administrative fee equal to 3.43% of premium and 9% of claims paid. These administrative fees are subject to the intercompany pooling agreement. In 2012, the Company recorded net CEA administrative fees of \$32,846.

Note 20 - Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

Fair value is the price that would be received to sell an asset or would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which generally utilizes market transaction data for identical or similar instruments.

The hierarchy level assigned to each security in the Company's portfolio is based on the Company's assessment of the transparency and reliability of the inputs used in the valuation of each instrument at the measurement date. The highest priority is given to Level 1 measurements and the lowest priority to Level 3 measurements. Securities are classified based on the lowest level of input that is significant to the fair value measurement. The Company recognizes transfers between levels at the end of each reporting period. The three hierarchy levels are defined as follows:

- Level 1 — Valuations based on unadjusted observable quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2 — Valuations based on directly or indirectly observable inputs (other than Level 1 prices) at the measurement date, such as quoted prices in active markets or prices in markets that are not active for similar assets or liabilities or other inputs that are observable.
- Level 3 — Valuations based on inputs that are unobservable and reflect the Company's own assumptions about the assumptions that market participants might use.

The following table summarizes the Company's assets and liabilities that are measured at fair value at December 31, 2012:

1 Description	2 Level 1	3 Level 2	4 Level 3	5 Total
Assets at fair value				
Bonds				
Issuer Obligations	-	3,599,982	-	3,599,982
Residential Mortgage-Backed Securities	-	999,668	-	999,668

Liabilities at fair value				
Derivative Liabilities	\$ -	\$ -	\$ -	\$ -
Total liabilities at fair value	\$ -	\$ -	\$ -	\$ -

The Company did not have significant transfers between Levels 1 and 2 during the period ended December 31, 2012.

2. Rollforward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the Level 3 category.

3. Policy on Transfers Into and Out of Level 3

The Company holds NAIC designated 3-6 securities at the lower of cost or market as defined by SSAP No. 26. Market fluctuations cause securities to change from being held at cost to fair value or vice versa. These changes result in a transfer in or out of Level 3. In addition, the Company also transfers securities in or out of level 3 as a result of re-evaluation of the observability of pricing inputs.

NOTES TO FINANCIAL STATEMENTS

4. Inputs and Techniques Used for Fair Value

Fixed Maturities

At each valuation date, the Company uses various valuation techniques to estimate the fair value of its fixed maturities portfolio. The primary method for valuing the Company's securities is through independent third-party valuation service providers. For positions where valuations are not available from independent third-party valuation service providers, the Company utilizes broker quotes and internal pricing methods to determine fair values. The Company obtains a single non-binding price quote from a broker familiar with the security who, similar to the Company's valuation service providers, may consider transactions or activity in similar securities, as applicable, among other information. The brokers providing price quotes are generally from the brokerage divisions of leading financial institutions with market making, underwriting and distribution expertise regarding the security subject to valuation. The evaluation and prioritization of these valuation sources is systematic and predetermined resulting in a single quote or price for each financial instrument. The following describes the techniques generally used to determine the fair value of the Company's fixed maturities by asset class:

U.S. government and agency

U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal Home Loan Bank, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. As the fair values of the Company's U.S. Treasury securities are based on unadjusted market prices, they are classified within Level 1. The fair value of U.S. government agency securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, reported trades, bids, offers and credit spreads. Accordingly, the fair value of U.S. government agency securities is classified within Level 2.

Mortgage-Backed Securities

The Company's portfolio of residential mortgage-backed securities ("MBS") and commercial MBS are originated by both agencies and non-agencies, the majority of which are pass-through securities issued by U.S. government agencies. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Asset-Backed Securities

Asset-backed securities ("ABS") include mostly investment-grade bonds backed by pools of loans with a variety of underlying collateral, including automobile loan receivables, credit card receivables, and collateralized loan obligation securities originated by a variety of financial institutions. The fair value of ABS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of ABS is primarily classified within Level 2.

Municipals

The Company's municipal portfolio comprises bonds issued by U.S. domiciled state and municipal entities. The fair value of municipal securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, broker quotes, issuer ratings, reported trades and credit spreads. Accordingly, the fair value of municipal securities is primarily classified within Level 2.

Corporate debt and other

Corporate debt securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair value of corporate and other securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, new issuances, issuer ratings, reported trades of identical or comparable securities, bids, offers and credit spreads. Accordingly, the fair value of corporate and other securities is primarily classified within Level 2. In the event third-party vendor valuation is not available, prices are determined using non-binding price quotes from a broker familiar with the security. In this instance, the valuation inputs are generally unobservable and the fair value is classified within Level 3.

Foreign government securities

Foreign government securities comprise bonds issued by foreign governments and their agencies along with supranational organizations. The fair value of foreign government securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, broker quotes, issuer ratings, reported trades of identical or comparable securities and credit spreads. Accordingly, the fair value of foreign government securities is primarily classified within Level 2.

Equity Securities

Equity securities include common and preferred stocks. Common stocks with fair values based on quoted market prices in active markets are classified in Level 1. Common stocks with fair values determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active are classified in Level 2. The fair value of preferred stock is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active. Accordingly, the fair value of preferred stock is primarily classified within Level 2.

NOTES TO FINANCIAL STATEMENTS

Other Investments

Other investments include primarily international loans, foreign cash deposits and equity investments in privately held businesses. International loans and cash deposits are primarily valued using quoted prices for similar instruments in active markets; these assets are categorized as Level 2 of the fair value hierarchy. Equity investments in privately held businesses are valued using internal management estimates; they are categorized as Level 3 of the hierarchy. Limited partnership investments, which represent the remainder of the other investment balance on the consolidated balance sheet, are not subject to these disclosures and therefore are excluded from the above table.

Note 25 - Changes in Incurred Losses and Loss Adjustment Expenses

Incurred loss and loss adjustment expense attributable to insured events on prior years has decreased through the fourth quarter of 2012. This decrease was primarily the result of an updated reserve analysis and improving loss trends in the Nonproportional Assumed Liability, Commercial Multiple Peril, Other Liability Occurrence, Fidelity/Surety, Homeowners and Farmowners lines. This increase was partially offset by deteriorating loss trends in the Workers' Compensation, Commercial Auto and Truck Liability lines. Prior estimates are revised as additional information becomes known regarding individual claims.

NOTES TO FINANCIAL STATEMENTS

Note 33 - Asbestos/Environmental Reserves

The Company has exposure to asbestos and environmental claims that emanate principally from general liability policies written prior to the mid-1980's. In establishing the Company's asbestos and environmental reserves, the Company estimates case reserves for anticipated losses and bulk reserves for claim adjustment expenses and incurred but not reported claims reserves ("IBNR"). The Company maintained casualty excess of loss reinsurance during the relevant periods. The reserves are reported net of cessions to reinsurers and include any reserves reported by ceding reinsurers on assumed reinsurance contracts.

Factors Contributing to Uncertainty in Establishing Adequate Reserves

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insureds with potential exposure, (vi) the cost to resolve claims, and (vii) the collectability of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental claims and claim adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim. The uncertainties cannot be reasonably estimated, but could have a material impact on the Company's future operating results and financial condition.

In the third quarter of 2011, the Company completed asbestos ground-up and aggregate environmental reserve studies. These studies were completed by a multi-disciplinary team of internal claims, legal, reinsurance and actuarial personnel, and included all major business segments of the Company's direct, assumed, and ceded asbestos and environmental unpaid claim liabilities. As part of the internal review, policyholders with the largest direct asbestos unpaid claim liabilities were individually evaluated using the Company's proprietary stochastic ground-up model, which is consistent with published actuarial methods of asbestos reserving. Among the factors reviewed in depth by the team of specialists were the type of business, level of exposure, coverage limits, geographic distribution of products, injury type, jurisdiction and legal defenses. Reinsurance recoveries for these policyholders were then separately evaluated by the Company's reinsurance and actuarial personnel. Asbestos and environmental unpaid claim liabilities for all other policyholders were evaluated using aggregate methods that utilized information and experience specific to these policyholders. The studies resulted in an increase to reserves.

Uncertainty Regarding Reserving Methodologies

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based on historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment. In that regard, the estimation of asbestos claims and associated liabilities and the analysis of environmental claims considered prevailing applicable law and certain inconsistencies of court decisions as to coverage, plaintiffs' expanded theories of liability, and the risks inherent in major litigation and other uncertainties, the Company believes that in future periods it is possible that the outcome of the continued uncertainties regarding asbestos and environmental related claims could result in an aggregate liability that differs from current reserves by an amount that could be material to the Company's future operating results and financial condition.

Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

The following tables summarize the activity for the Company's asbestos and environmental claims and claim adjustment expenses, a component of the Company's unpaid claims and claim adjustment expenses, for the years ended December 31, 2012, 2011, 2010, 2009, and 2008:
