NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

Effective January 1, 2001, and subject to any deviations prescribed or permitted by the State of Wisconsin, the accompanying financial statements of Wausau Business Insurance Company (the "Company") have been prepared in conformity with the National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures Manual* ("APP Manual").

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. It also requires estimates in the disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro-rata methods. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company applies the following accounting policies, where applicable:

1. Short term investments are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the Purposes and Procedures Manual of the NAIC Securities Valuation Office (SVO Manual).
2. Bonds are carried at cost, adjusted where appropriate for amortization of premium or discount, or fair value as specified by the SVO Manual.
3. Common stocks are carried at fair value, except that investments in stocks of subsidiaries, controlled and affiliated ("SCA") companies are carried according to Note 1C(7).
4. Preferred stocks are carried at cost or fair value as specified by the SVO Manual. Preferred stocks of SCA companies are carried according to Note 1C(7).
5. Mortgage loans are carried at unpaid principal balances, less impairments as specified by the SVO Manual.
6. Mortgage backed/asset backed securities are carried at amortized cost or fair value based on guidance in the SVO Manual. Prepayment assumptions for mortgage backed/asset backed securities are updated monthly using the Bloomberg data service. The retrospective adjustment method is used to value all mortgage backed/asset backed securities.
7. Investments in SCA companies are carried in accordance with SSAP No. 97, *Investment in Subsidiaries, Controlled Entities and Affiliates*, and the SVO Manual.
8. Investments in joint ventures, partnerships, and limited liability companies are carried in accordance with SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies*, and the SVO Manual.
9. Derivative Securities, refer to Note 8.
10. Investment income is anticipated as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, *Property Casualty Contracts - Premiums*. Refer to Note 30.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods, for making such estimates and for establishing the resulting liability, are continually reviewed and follow current standards of practice. Any adjustments to the liability are reflected in the period that they are determined.
12. The Company did not change its capitalization policy in 2010.
13. The Company has no pharmaceutical rebate receivables.

If the Company believes a decline in the value of a particular investment is temporary, the decline is recorded as an unrealized loss in policyholders' equity. If the decline is believed to be "other-than-temporary," and the Company believes it will not be able to collect all cash flows due on its fixed income securities, then the carrying value of the investment is written down to the expected cash flow amount and a realized loss is recorded as a credit impairment.

 - (3) Sources of collateral are cash and securities. Cash collateral is reinvested by the lending agent in short term securities.

Borrowers of these securities provide collateral equal to or in excess of 102% of the market value of the loaned securities. Acceptable collateral may be in the form of cash or U.S. Government securities, such as Treasuries and Agency Bonds. Note 20 - Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

Fair value is the price that would be received to sell an asset or would be paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which generally utilizes market transaction data for identical or similar instruments.

The hierarchy level assigned to each security in the Company's portfolio is based on the Company's assessment of the transparency and reliability of the inputs used in the valuation of each instrument at the measurement date. The highest priority is given to Level 1 measurements and the lowest priority to Level 3 measurements. Securities are classified based on the lowest level of input that is significant to the fair value measurement. The Company recognizes transfers between levels at the end of each reporting period. The three hierarchy levels are defined as follows:

- Level 1 — Valuations based on unadjusted observable quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2 — Valuations based on directly or indirectly observable inputs (other than Level 1 prices) at the measurement date, such as quoted prices in active markets or prices in markets that are not active for similar assets or liabilities or other inputs that are observable.
- Level 3 — Valuations based on inputs that are unobservable and reflect the Company's own assumptions about the assumptions that market participants might use.

The following table summarizes the Company's assets and liabilities that are measured at fair value at December 31, 2010:

1	2	3	4	5
Description	Level 1	Level 2	Level 3	Total
Assets at fair value				
Bonds				
Residential Mortgage-Backed Securities		\$3,175,220		\$3,175,220
Total Bonds		3,175,220		3,175,220
Preferred Stocks	-	-	-	-
Common Stocks	-	-	-	-
Total assets at fair value	\$0	\$3,175,220	\$0	\$3,175,220
Liabilities at fair value				
Total liabilities at fair value	\$0	\$0	\$0	\$0

The Company did not have significant transfers between Levels 1 and 2 during the year ended December 31, 2010.

2. Rollforward of Level 3 Items

The Company has no assets or liabilities measured at fair value in the Level 3 category.

3. Policy on Transfers Into and Out of Level 3

Transfers in and/or out of Level 3 are due to re-evaluation of the observability of pricing inputs.

4. Inputs and Techniques Used for Fair Value

Fixed Maturities

At each valuation date, the Company uses various valuation techniques to estimate the fair value of its fixed maturities portfolio. The primary method for valuing the Company's securities is through independent third-party valuation service providers. For positions where valuations are not available from independent third-party valuation service providers, the Company utilizes broker quotes and internal pricing methods to determine fair values. The Company obtains a single non-binding price quote from a broker familiar with the security who, similar to the Company's valuation service providers, may consider transactions or activity in similar securities, as applicable, among other information. The brokers providing price quotes are generally from the brokerage divisions of leading financial institutions with market making, underwriting and distribution expertise regarding the security subject to valuation. The evaluation and prioritization of these valuation sources is systematic and predetermined resulting in a single quote

NOTES TO FINANCIAL STATEMENTS

or price for each financial instrument. The following describes the techniques generally used to determine the fair value of the Company's fixed maturities by asset class:

U.S. government and agency

U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal Home Loan Bank, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. As the fair values of the Company's U.S. Treasury securities are based on unadjusted market prices, they are classified within Level 1. The fair value of U.S. government agency securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, reported trades, bids, offers and credit spreads. Accordingly, the fair value of U.S. government agency securities is classified within Level 2.

Mortgage-Backed Securities

The Company's portfolio of residential mortgage-backed securities ("MBS") and commercial MBS are originated by both agencies and non-agencies, the majority of which are pass-through securities issued by U.S. government agencies. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Asset-Backed Securities

Asset-backed securities ("ABS") include mostly investment-grade bonds backed by pools of loans with a variety of underlying collateral, including automobile loan receivables, credit card receivables, and collateralized loan obligation securities originated by a variety of financial institutions. The fair value of ABS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of ABS is primarily classified within Level 2.

Municipals

The Company's municipal portfolio comprises bonds issued by U.S. domiciled state and municipal entities. The fair value of municipal securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, broker quotes, issuer ratings, reported trades and credit spreads. Accordingly, the fair value of municipal securities is primarily classified within Level 2.

Corporate debt and other

Corporate debt securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair value of corporate and other securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, new issuances, issuer ratings, reported trades of identical or comparable securities, bids, offers and credit spreads. Accordingly, the fair value of corporate and other securities is primarily classified within Level 2. In the event third-party vendor valuation is not available, prices are determined using non-binding price quotes from a broker familiar with the security. In this instance, the valuation inputs are generally unobservable and the fair value is classified within Level 3.

Foreign government securities

Foreign government securities comprise bonds issued by foreign governments and their agencies along with supranational organizations. The fair value of foreign government securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, broker quotes, issuer ratings, reported trades of identical or comparable securities and credit spreads. Accordingly, the fair value of foreign government securities is primarily classified within Level 2.

Equity Securities

Equity securities include common and preferred stocks. Common stocks with fair values based on quoted market prices in active markets are classified in Level 1. Common stocks with fair values determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active are classified in Level 2. The fair value of preferred stock is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active. Accordingly, the fair value of preferred stock is primarily classified within Level 2.

Other Investments

Other investments include primarily international loans, foreign cash deposits and equity investments in privately held businesses. International loans and cash deposits are primarily valued using quoted prices for similar instruments in active markets; these assets are categorized as Level 2 of the fair value hierarchy. Equity investments in privately held businesses are valued using internal management estimates; they are categorized as Level 3 of the hierarchy. Limited partnership investments, which represent the remainder of the other investment balance on the consolidated balance sheet, are not subject to these disclosures and therefore are excluded from the above table.

Note 27 - Structured Settlements

- A. As a result of purchased annuities with the claimant as payee, The Company no longer carries reserves of \$2,136,800 after applying Inter-Company Reinsurance Agreement percentages. The Company is contingently liable should the issuers of the purchased annuities fail to perform under the terms of the annuities. The amount of unrecorded loss contingencies related to the purchased annuities was \$2,136,800 as of December 31, 2010.
- B. A summary of purchased structured settlement annuities exceeding 1% of policyholders' surplus and whereby the Company has not obtained a release of liability from the claimant is as follows:

Note 30 - Premium Deficiency Reserves

2. Date of the most recent evaluation of this liability	12/31/2010

Note 31 - High Dollar Deductible Policies

As of December 31, 2010, the amount of reserve credit recorded for high dollar deductible policies on unpaid losses was \$19,290,770 and the amount billed and recoverable on paid claims was \$890,106.

Note 32 - Discounting of Liabilities for Unpaid Losses and Unpaid Loss Adjustment Expenses

For Workers Compensation, the Company discounts its reserves for unpaid losses using a tabular discount on the long-term annuity portion of certain workers compensation claims. The tabular discount is based on the Unit Statistical Plan tables as approved by the respective states at an annual discount rate of 4.0%. The December 31, 2010 liabilities subject to discount were carried at a value representing a discount of \$4,529,722 net of all reinsurance.

For all other lines, the Company does not discount its reserves for unpaid losses and loss adjustment expenses.

Note 33 - Asbestos/Environmental Reserves

The Company has exposure to asbestos and environmental claims which emanate principally from general liability policies written prior to the mid-1980's. In establishing the Company's asbestos and environmental reserves, the Company estimates case basis reserves for anticipated losses and bulk reserves for loss adjustment expenses and incurred but not reported losses. The Company maintained casualty excess of loss reinsurance during the relevant periods. The reserves are reported net of expected recoveries from reinsurers and include any reserves reported by ceding reinsurers on assumed reinsurance contracts.

Upon the de-affiliation of EICOW, WBIC, WUIC and WGIC ("Wausau Companies") from the Nationwide Group and becoming members of the Liberty Pool, the Wausau Companies entered into ceded reinsurance contracts whereby Nationwide Indemnity Company assumed full responsibility for the obligations on certain policies with effective dates prior to January 1, 1986, including all asbestos and environmental exposures.

NOTES TO FINANCIAL STATEMENTS

Factors Contributing to Uncertainty in Establishing Adequate Reserves

The process of establishing reserves for asbestos and environmental claims is subject to greater uncertainty than the establishment of reserves for liabilities relating to other types of insurance claims. A number of factors contribute to this greater uncertainty surrounding the establishment of asbestos and environmental reserves, including, without limitation: (i) the lack of available and reliable historical claims data as an indicator of future loss development, (ii) the long waiting periods between exposure and manifestation of any bodily injury or property damage, (iii) the difficulty in identifying the source of asbestos or environmental contamination, (iv) the difficulty in properly allocating liability for asbestos or environmental damage, (v) the uncertainty as to the number and identity of insureds with potential exposure, (vi) the cost to resolve claims, and (vii) the collectability of reinsurance.

The uncertainties associated with establishing reserves for asbestos and environmental losses and loss adjustment expenses are compounded by the differing, and at times inconsistent, court rulings on environmental and asbestos coverage issues involving: (i) the differing interpretations of various insurance policy provisions and whether asbestos and environmental losses are or were ever intended to be covered, (ii) when the loss occurred and what policies provide coverage, (iii) whether there is an insured obligation to defend, (iv) whether a compensable loss or injury has occurred, (v) how policy limits are determined, (vi) how policy exclusions are applied and interpreted, (vii) the impact of entities seeking bankruptcy protection as a result of asbestos-related liabilities, (viii) whether clean-up costs are covered as insured property damage, and (ix) applicable coverage defenses or determinations, if any, including the determination as to whether or not an asbestos claim is a products/completed operation claim subject to an aggregate limit and the available coverage, if any, for that claim. These uncertainties cannot be reasonably estimated, but could have a material impact on the Company's future operating results and financial condition.

In the last few years the Company, as well as the industry generally, has seen decreases in the number of asbestos claims being filed. This turn to a more favorable trend is due to a number of factors. Screening activity used by some lawyers to find new plaintiffs has been as a result of questionable practices discovered in the Federal Silica Multi District Litigation. Court decisions in several key states have been favorable to defendants. More importantly, several states have enacted legislation in the past few years that contain medical criteria provisions aimed at reducing the number of lawsuits filed by unimpaired plaintiffs and providing prompt and fair compensation to those who meet the criteria.

Uncertainty Regarding Reserving Methodologies

As a result of the significant uncertainty inherent in determining a company's asbestos and environmental liabilities and establishing related reserves, the amount of reserves required to adequately fund the Company's asbestos and environmental claims cannot be accurately estimated using conventional reserving methodologies based upon historical data and trends. As a result, the use of conventional reserving methodologies frequently has to be supplemented by subjective considerations including managerial judgment. In that regard, the estimation of asbestos claims and associated liabilities and the analysis of environmental claims considered prevailing applicable law and certain inconsistencies of court decisions as to coverage, plaintiffs' expanded theories of liability, and the risks inherent in major litigation and other uncertainties, the Company believes that in future periods it is possible that the outcome of the continued uncertainties regarding asbestos and environmental related claims could result in an aggregate liability that differs from current reserves by an amount that could be material to the Company's future operating results and financial condition.

In the third quarter of 2009, the Company completed its biennial ground-up asbestos reserve study. The study was completed by a multi-disciplined team of internal claims, legal, reinsurance and actuarial personnel, and it included all major segments of the Company's direct, assumed, and ceded asbestos claims. As part of the internal review, potential exposures of certain policyholders were individually evaluated using the Company's proprietary stochastic model, which is consistent with the latest published actuarial paper on asbestos reserving. Among the factors reviewed in depth by the team of specialists were the type of business, level of exposure, coverage limits, geographic distribution of products, types of injury, state jurisdictions, legal defenses, and reinsurance potential. The remaining policyholders (those with less potential exposure) were evaluated using aggregate methods that utilized information and experience specific to these insureds. Between comprehensive studies, the Company monitors asbestos activity to determine whether or not any adjustment to reserves is warranted. The Company also completed its annual study on the environmental claims liability, resulting in immaterial adjustments to held reserves. During 2010 the Company monitored asbestos and environmental activity to determine whether or not any adjustment to reserves is warranted. Based on this review of actual emerged losses, no material adjustments were made.

Effect of Uncertainty in Reserving For Asbestos and Environmental Claims on Company's Financial Condition

The methods of determining estimates for reported and unreported losses and establishing resulting reserves and related reinsurance recoverables are periodically reviewed and updated, and adjustments resulting from this review are reflected in income currently.

The table below summarizes reserve and loss activity for the Company's asbestos and environmental loss and loss adjustment expenses for each of the five most recent calendar years. Gross reserves for both asbestos and environmental are representative of the companies included in Note 26. Net reserves for asbestos and environmental are allocated based on the Company's Intercompany Reinsurance Agreement, as discussed in Note 26.
